***Expect pacing operations along parts of 85-385 project tonight***

GREENVILLE, S.C. – Drivers should expect pacing operations tonight at the Woodruff Road onramp to I-385 North along with parts of I-385 North as part of the 85-385 Gateway Project.

A pacing operation occurs when the Highway Patrol temporarily slows, but does not stop traffic during heavy construction work. There should be no significant impact to the travelling public. These pacing operations are being done to fracture rock via blasting work to facilitate the installation of storm drainage pipe on the project.

**About the 85-385 Gateway Project:**

The 85-385 Gateway Interchange Improvement Project will provide an economic boost to the Upstate, improve safety for the traveling public, and increase the capacity of this Interchange to function more efficiently for many years to come. At \$231 million, it is the second largest transportation project in South Carolina History. Learn more at [www.85385gateway.com](http://www.85385gateway.com).
